OXY 🔥 High Potential

Occidental Petroleum Corporation

Energy | Oil & Gas E&P

10-DAY PRICE

DAILY RETURNS

+13.8%	$53.61	6/10	1.6×	72.3	-1.1%
10D RETURN	PRICE	UP DAYS	VOLUME VS AVG	RSI	VS 52W HIGH

🟩🟩🟩🟩🟩🟩⬜⬜⬜⬜

💡 **Meets primary momentum criteria — building trend confirmed**

- ✅ Closed higher on **6/10** recent trading days — meets momentum threshold.
- ✅ Volume at **1.6×** average — above-normal activity, likely institutional interest.
- ✅ Trading **1.1%** below its 52-week high — near breakout territory.
- ✅ **+13.8%** gain in 10 trading days — exceeds our 10% qualification threshold.
- ✅ RSI at **72.3** — ideal momentum zone (50–75): strong trend, not yet overbought.

Occidental Petroleum Corporation (Energy — Oil & Gas E&P) has demonstrated strong short-term momentum: up **13.8%** over the past 10 trading days with **6 of those 10 days** closing higher. This pattern, combined with significantly above-average volume (suggesting institutional buying), indicates the move has broad market participation. The RSI of **72.3** sits in the healthy momentum zone without being overbought, and the stock is currently just 1% from its 52-week high. The volume surge (1.6× baseline) is a key signal: it often precedes a sustained trend as institutional money flows

in before retail catches on. **Strategy:** Look for a 1–3 day pullback to the 10-day moving average as a lower-risk entry. Set a hard stop at −8% from entry and take partial profit at +20%.

PLUG 🔥 High Potential

Plug Power Inc.

Industrials | Electrical Equipment & Parts

10-DAY PRICE

DAILY RETURNS

+33.3%	$2.48	5/10	1.0×	69.7	-4.2%
10D RETURN	PRICE	UP DAYS	VOLUME VS AVG	RSI	VS 52W HIGH

💡 High-conviction momentum move with broad participation

- ✅ Closed higher on **5/10** recent trading days — meets momentum threshold.
- ⚠️ Volume at **1.0×** average — normal, no unusual activity yet.
- ✅ Trading **4.2%** below its 52-week high — near breakout territory.
- ✅ **+33.3%** gain in 10 trading days — exceptional near-term return.
- ✅ RSI at **69.7** — ideal momentum zone (50–75): strong trend, not yet overbought.

Plug Power Inc. (Industrials — Electrical Equipment & Parts) has demonstrated strong short-term momentum: up **33.3%** over the past 10 trading days with **5 of those 10 days** closing higher. This pattern, combined with average volume, indicates the move has broad market participation. The RSI of **69.7** sits in the healthy momentum zone without being overbought, and the stock is currently just 4% from its 52-week high. **Strategy:** Look for a 1–3 day pullback to the 10-day moving average as a lower-risk entry. Set a hard stop at −8% from entry and take partial profit at +20%.

❌ RSI at **26.0** — weak / oversold territory.

Sunrun Inc. is on our watchlist for needs 1 more up day(s) (currently 4/10), needs 49.6% more price gain (currently +-39.6%). The elevated volume (1.9×) is encouraging and suggests accumulation is underway. **Watch for:** continued daily gains and volume staying above average. If momentum continues for 2–3 more sessions, this stock may graduate to the High Potential list.

📋 Quick Strategy Reference

✅ **ENTRY**

Buy the **first pullback** after a surge (1–3 days). Look for price holding the 10-day EMA on low volume.

🛑 **STOP-LOSS**

Hard stop at **−8% from entry**. Never move stop lower. Exit immediately if violated.

💰 **PROFIT TARGET**

Sell **25% at +20%** gain. Trail the rest with a 10-day MA stop. Full exit below 50-day MA on volume.

⚖️ **POSITION SIZE**

Risk **max 1–2% of portfolio** per trade. Start with half size; add the rest when the move confirms.
